

GCSE Results 2026

Well done to our Y11 pupils and their teachers for another year of hard earned results. This year we had a cohort of 4 pupils, with 75% of these having significant additional needs.

Immanuel Christian School is a non-selective school which has small cohorts each academic year, and this means that our statistics have the potential to vary quite widely year on year. Reporting results as a percentage when cohorts are small is often not helpful, nor does it tell the whole picture. It does, however, provide some anonymity for individual pupils. We were delighted this year with our results which show just how hard staff and pupils have worked.

Here are some of the headlines:

In 77% of grades awarded, pupils exceeded CAT predictions by a significant margin. In over 90% of grades awarded pupils achieved or exceeded CAT predictions.

Half of our cohort achieved passes in English language and Maths.

81% of grades awarded were 4-9

25% of grades awarded were grade 9
